Herein, 'the Company' will refer to Musarubra US LLC or its subsidiaries in the U.S. and/or other countries under which the Trellix and Skyhigh Security divisional branded products, solutions and programs, and Customer Success Group's services, are operated.

Prices are subject to change without notice, subject to contractual obligations that may apply. Prices are exclusive of tax, handling and freight. The Company's Resellers should contact their preferred Company authorized Distributor for pricing inquires.

Quote Handbook

The Quote Handbook contains the Comapany's standard polices required to accurately build a valid quote and order. The Handbook is comprised of four major categories: Business Policies, Product Policies, Solution Services Policies and Technical Support Policies. Please refer to this guide when quoting or ordering solutions.

Trellix/Skyhigh Sales

Export Compliance

The Company's Products and software are subject to the export control laws and regulations of the United State of America ("US"), and any amendments thereof. These products must not be exported or re-exported directly or indirectly, to (i) any countries that are subject to US export restrictions (Cuba, Iran, North Korea, Sudan, Syria, and Crimea Region of Ukraine); (ii) any end user that will utilize the products in the design, development or production of nuclear, chemical or biological weapons; or (iii) any end user who has been prohibited from participating in US export transactions by any federal agency of the US government. You further acknowledge that Products would be subject to the export rules and regulations in the country in which you operate. Additional information on US requirements can be found on the Company's export compliance page at:

https://www.trellix.com/en-us/about/export-compliance.html

Technical Support

Log in, then go to [Support] Tab

Electronic Software Distribution

In order to get the latest, up to date products into our Customer's hands quickly and efficiently, the Company supports Electronic Software Delivery for our Enterprise Software Products. In some Regions media kits are available for purchase. Upon receipt of their electronically delivered grant letter, Customers will be able to immediately access, download and install the latest version of their on premise product via the Company's download site. This download site is available at:

https://www.trellix.com/en-us/downloads.html

Confidential and Proprietary – Distribution of this document in part or whole is not permitted without the written consent of the Company. Please note that any information relating to product status changes (e.g. end of life, end of sale, new products, bundles, promotions) that is conveyed as part of the price book, channel webcasts or other forms of communication to distributors or resellers is held to the confidentiality clause contained within your executed partner agreement. The receiver of this information shall exercise a reasonable degree of care to protect the Confidential Information from unauthorized disclosure.

In the course of assisting channel partners in marketing, identifying business opportunities or in any other dealings, the Company sales staff are not permitted or authorized to set fixed or minimum resale prices or influence in any way channel partners' prices to their customers (including any element of resale pricing such as margins, discounts or rebates.) Any reference to resale prices (and any element of resale prices) by the Company sales staff is a non-binding recommendation only.

Trellix and Skyhigh Security are the trademark or registered trademark of Musarubra US LLC and their affiliates in the US and /or other countries. Other names and brands are the property of these companies or may be claimed as the property of others.
Non Trellix/Skyhigh Trademark Notice: Other names and brands may be claimed as the property of others.

Trellix Helix

Helix (SaaS)

HEXES

Helix Essentials
LICENSE: Event ingestion volume rate (GB/day).
DELIVERABLE: Software as a Service (SaaS) with activation email.
MANAGEMENT: Helix.
CONTENT: Helix Essentials, a cloud-hosted security operations platform with alert correlation, threat hunting (search), and hyperautomation capabilities. Includes up to 30 days (30GB per unit) retention and 20GB/day of search volume per unit. Event ingestion volume rate is determined by band and count. Hyperautomation includes 100 manual executions per day for Trellix products. Past 2 days of event data are not counted against the search quota.
RESTRICTIONS:Exceeding the daily search quota 3 times in 30 days, the search is limited to the quota for 30 days. A single search cannot exceed the daily search quota by 5 times. The daily Hyperautomation workflow execution can be exceeded by up to 25%, but no more than 3 times in 30 days.

MDR1-HLX		**Managed Detection & Response Service 1 for Helix** LICENSE: Event ingestion volume rate (GB/day) DELIVERABLE: Soc as a Service (SaaS) for Trellix Helix MANAGEMENT: Helix FEATURES INCLUDED: Trellix Managed Detection and Response (MDR) is a fully managed service that empowers organizations to enhance their cybersecurity posture without the burden of building and maintaining in-house resources and expertise. Many organizations struggle to obtain or maintain the necessary security infrastructure, leaving them vulnerable to increasingly sophisticated threats. Trellix MDR solves this challenge by delivering a comprehensive solution that integrates Trellix Helix with the expertise, people, and processes required for effective threat mitigation. Trellix MDR for Helix offers continuous 24/7/365 monitoring and rapid incident response, ensuring that organizations stay protected around the clock. With expert-led security operations, Trellix MDR identifies and responds to threats before they can cause significant harm. This service also includes tailored security recommendations and remediation guidance, providing organizations with peace of mind and a worry-free approach to managing endpoint security. RESTRICTIONS: Must Have Equal Number of Trellix Helix Licenses purchased, at the same time or previously. For further exceptions, please refer to the Quoting Handbook.

MDR1-EDR	**Managed Detection & Response Service 1 for EDR** LICENSE: Per User DELIVERABLE: Soc as a Service (SaaS) with activation email to accompany Trellix Endpoint Security MANAGEMENT: SaaS EDR, TRXE or Enterprise FEATURES INCLUDED: Trellix Managed Detection and Response (MDR) is a fully managed service that empowers organizations to enhance their cybersecurity posture without the burden of building and maintaining in-house resources and expertise. Many organizations struggle to obtain or maintain the necessary security infrastructure, leaving them vulnerable to increasingly sophisticated threats. Trellix MDR solves this challenge by delivering a comprehensive solution that integrates Trellix EDR with the expertise, people, and processes required for effective threat mitigation. Trellix MDR offers continuous 24/7/365 monitoring and rapid threat response, ensuring that organizations stay protected around the clock. With expert-led security operations, Trellix MDR identifies and responds to threats before they can cause significant harm. This service also includes tailored security recommendations and remediation guidance, providing organizations with peace of mind and a worry-free approach to managing endpoint security. The MDR service primarily relies on North America-based personnel and tools. RESTRICTIONS: Must Have Equal Number of Trellix EDR Licenses purchased, at the same time or previously. For further exceptions, please refer to the Quoting Handbook. LIMITATIONS and REQUIREMENTS: Customers must have at least 250 licenses of EDR (through MV6, TRXE1, Enterprise or suitable suite) that are new or active subscriptions.

EDM1	**Endpoint Defense Management (EDM) Service** LICENSE: Per User DELIVERABLE: Endpoint Management as a Service with activation email to accompany Trellix Endpoint Security MANAGEMENT: ENS, EDR, Forensics, TRXE, Core or Enterprise FEATURES INCLUDED: Trellix Endpoint Defense Management (EDM) is a fully managed service that empowers organizations to enhance their cybersecurity posture. Many organizations struggle to optimize their security infrastructure, leaving them vulnerable to increasingly sophisticated threats. Trellix EDM solves this challenge by delivering the expertise, people, and processes required for effective endpoint optimization. Trellix provides continuous management and health monitoring for Trellix Endpoint Security solutions, utilizing the ePolicy Orchestrator (ePO) platform. This service includes: - Policy Management: Configuration and deployment of ENS, EDRF, and ePO policies based on the customer's requirements. - Endpoint Monitoring: Proactive monitoring of Managed Endpoints to ensure correct deployment, updates, and reporting of Endpoint Software. - Reporting: Periodic reports on Managed Endpoint health and policy compliance. The customer is responsible for onboarding and installation requirements, timely responses to Trellix communications,. This service does not include alert triage, threat investigation, 24x7 threat response, remediation, or in-depth incident investigation and forensic analysis that is included in the MDR service. RESTRICTIONS: Must Have Equal Number of Trellix Endpoint Licenses purchased, at the same time or previously. API purchase is needed in addition. A functioning EPO is required, for on-prem EPO

EPENH	**Trellix Endpoint Enterprise Hybrid** LICENSE: Per User DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment. IaaS in AWS, Azure or GCP for Trellix Endpoint Security (HX) MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, Endpoint Security (HX)- Cloud HX, Endpoint Security (HX) – vHX, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL). FEATURES INCLUDED: Unified Trellix EDR with Forensics (EDRF) client combines Trellix Endpoint Security HX and Trellix EDR traces, offering comprehensive detection, investigation, forensics, and response for Windows, macOS, and Linux platforms for on-prem environments. Includes EDRF on-prem (EOP) Virtual Appliance for on-prem Historical Search. Includes Protection for Native Security, Endpoint Security for Windows, macOS, and Linux Platforms, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights for profiling "Top Attacks" with guidance to improve protection, and access to deploy Strategic Innovation Alliance (SIA) partner products. HX Controller deployment options include HW, HW DMZ, Virtual Appliance (VA), VA DMZ and Cloud. Up to 10 VA for HX included in the subscription cost but must be quoted separately. HW appliance and Cloud HX deployment SKUs need to be purchased separately. Quotes and Orders must additionally include the required number of deployment option physical/virtual appliances if required by customer - for corresponding appliance activation keys. LIMITATIONS and REQUIREMENTS: Customers must initially purchase a minimum of 250 licenses. RESTRICTIONS: Limited to a maximum of 5 devices per User. ePO - SaaS does not support all product features. Refer to specific product documentation for the latest compatibility with ePO - SaaS.

	Insights (SaaS & On-Premise)				
MVI	**Trellix Insights** LICENSE: Trellix Insights is licensed on a Per User basis, based on number of ENS endpoints being monitored. There is no license code required, as verification of usage is done through the Cloud connection. In other words, Trellix can measure, on the backend, exactly how many users are being monitored by the Insights extension. DELIVERABLE: Enablement via cloud delivery or extension for ePO - On–prem or ePO - IaaS customers. Updates to Insights can be either through a new extension binary or can be Cloud – only, based on the capabilities being delivered. REQUIREMENTS: Requires telemetry from ENS10.7 with Trellix Agent 5.6.x and management through ePO - On–prem (V5.10 CU7) or ePO - SaaS. MANAGEMENT: Trellix Insights is managed via EPO (ePO - SaaS, ePO - On–prem, ePO - IaaS). Entitlement to EPO management component IS NOT included with this Subscription. FEATURES: Trellix Insights PRIORITIZES threats that matter to you by PREDICTING if your countermeasures can detect & PRESCRIBING changes if countermeasures have insufficient coverage. It includes comprehensive Curated Cyber Intelligence Attack information on over 4 years' worth of Campaigns, provided by Trellix Threat Research). It also includes global detection comparisons among industry sectors and geographies, Trellix Technology detection information for all Campaigns, Security Posture Scoring for endpoints, Comparative Protection Efficacy Reports, as well as guidance on how to improve protection for endpoints. Guidance is provided through KB articles and ePO policy adjustments done by the users. Trellix Insights requires Endpoint Security telemetry to function properly. If you do not want to provide this telemetry, you should not choose this product as you will not be able to receive full value. If you have questions, please contact your Trellix Account Team. HIGHLY RECOMMENDED: Trellix EDR - due to available integration between Trellix Insights and the EDR. Premium Support and/or Services (e.g. Trellix Thrive Advanced or Elite)

Trellix Server Security

Cloud Workload Security EDR

CWSDR

Trellix Cloud Workload Security Detect and Respond
LICENSE: Per OS Instance.
DELIVERABLE: Download.
MANAGEMENT: ePO - On-prem, ePO - IaaS.
PRODUCT CONTENT: Cloud Workload Security for hybrid cloud: (VMware, OpenStack, AWS and Azure), Endpoint Security for Servers, Endpoint Security Firewall Module, Endpoint Security for Linux, Threat Intelligence Exchange (TIE), MOVE Enterprise (includes: MOVE AV Agentless and Multi-Platform), Network Visibility and Micro-Segmentation based firewall, Application Control for Servers, Change Control for Servers. Trellix EDR Guided investigations utilizing 30-days of historical endpoint data. EDR is hosted in the North America data center and is a SaaS service with email and agent download. Includes entitlement to upgrade to our latest EDRF Client that will replace EDR Client. We recommend using it in place of the standard EDR Client. Note this does not entitle to all EDRF functionality included in Endpoint Enterprise.

ACS	**Trellix Application Control for Servers - OnPrem Perpetual** LICENSE: Per Server. DELIVERABLE: Software download MANAGEMENT: ePO-OnPrem PRODUCT CONTENT: Protect servers from unauthorized applications and system changes with Trellix Application Control. Create and easily manage allow/deny lists and protect against memory exploits with this OnPrem-managed application. Gain deeper visibility into application changes with periodic inventory reports, helping identify gaps in protected endpoints. Designed to secure highly critical server environments, including manufacturing and non-traditional AV scenarios. NOTE: These devices are function specific (mfg. devices, etc.) and in some cases cannot handle the load of traditional AntiVirus applications

CDB-S	**Trellix Data Encryption Suite - Subscription** LICENSE: Per Endpoint (Total number of Laptops, Workstation and Servers) DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment. MANAGEMENT: ePO - SaaS and ePO - On-prem included to manage Drive Encryption, File & Removable Media Protection and Native Drive Encryption Subscriptions. PRODUCT CONTENT: Trellix Drive Encryption offers a full disk encryption solution with user and role-based access control, end user self-service recovery options, and full auditing capabilities for compliance needs. Trellix File & Removable Media Protection offers an encryption solution for files, folders, network shares, removable media and optical media, with the ability to define compartments of data that can only be accessed by authorized personnel or managed devices. Trellix Native Drive Encryption offers a light-weight, centralized solution for managing the native full disk encryption technology of Microsoft (BitLocker) and Apple (FileVault) devices, with a focus on low maintenance and quick time-to-compliance. All three solutions are managed from within the same unified ePO console. PRODUCT REQUIRES: ePO - SaaS or ePO - On-prem for on-premises of Drive Encryption, File & Removable Media Protection and Native Drive Encryption. Does not require Endpoint protection, but will require the Trellix Agent. Note: Trellix File & Removable Media Protection in ePO SaaS is currently limited to removable media offsite encryption.

CDB	**Trellix Data Encryption Suite** LICENSE: Per Endpoint (Total number of Laptops, Workstation and Servers) DELIVERABLE: Download. MANAGEMENT: ePO - On-prem, ePO - IaaS. PRODUCT CONTENT: Trellix Drive Encryption offers a full disk encryption solution with user and role-based access control, end user self-service recovery options, and full auditing capabilities for compliance needs. Trellix File & Removable Media Protection offers an encryption solution for files, folders, network shares, removable media and optical media, with the ability to define compartments of data that can only be accessed by authorized personnel or managed devices. Trellix Native Drive Encryption offers a light-weight, centralized solution for managing the native full disk encryption technology of Microsoft (BitLocker) and Apple (FileVault) devices, with a focus on low maintenance and quick time-to-compliance. All three solutions are managed from within the same unified ePO console.

	Data Loss Prevention (DLP) (Perpetual + Support) All new/ initial DLP opportunities require Professional Services. Reference the Quoting Handbook Product Requirements General Guidance, under Data Security section, for detailed quote and order guidance.				
DLP	**Trellix Data Loss Prevention Endpoint Complete** LICENSE: Per Endpoint (Total number of Laptops, Workstation and Servers) DELIVERABLE: Download. MANAGEMENT: Managed by: ePolicy Orchestrator (on-premises or public cloud) PRODUCT CONTENT: A comprehensive data loss prevention solution, comprised DLP Endpoint & Device Control that can be installed on end-stations across the enterprise, and a logging and analysis server, through which centrally-managed policies are deployed, real-time events are monitored and reports are generated. Centrally managed security policies are applied on end-stations and are used to monitor and restrict the usage and transfer of sensitive data. The result is a cost-effective and flexible solution that offers innovative methods for preventing classified information from leaking out of the organization and effectively addresses data loss problems.

Database Security (Perpetual + Support)

DCD

Trellix Database Security
LICENSE: Per Database Instance.
DELIVERABLE: Download.
PRODUCT CONTENT: Trellix Database Security finds and protects sensitive information in databases from accidental leakage or intentional exploitation while maintaining database performance and managing user access. Adding this protection to the Data Security Suite will provide the most comprehensive protection for sensitive information across the environment. Products included are Databases Activity Monitoring which provides real-time database activity monitoring, intrusion prevention, Virtual Patching for databases which helps ensure patches are applied quickly when available and adds security when patches can't be applied, and Vulnerability Manager for Databases which scans databases and reports on patch levels, detected vulnerabilities, insecure code, weak passwords, rootkits and other malware.

EPENH-DE	**Trellix Endpoint Enterprise Hybrid (Germany Data Center)** LICENSE: Per User DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment. IaaS in AWS, Azure or GCP for Trellix Endpoint Security (HX) MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, Endpoint Security (HX)- Cloud HX, Endpoint Security (HX) – vHX, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL). FEATURES INCLUDED: Unified Trellix EDR with Forensics (EDRF) client combines Trellix Endpoint Security HX and Trellix EDR traces, offering comprehensive detection, investigation, forensics, and response for Windows, macOS, and Linux platforms for on-prem environments. Includes EDRF on-prem (EOP) Virtual Appliance for on-prem Historical Search. Includes Protection for Native Security, Endpoint Security for Windows, macOS, and Linux Platforms, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights for profiling "Top Attacks" with guidance to improve protection, and access to deploy Strategic Innovation Alliance (SIA) partner products. HX Controller deployment options include HW, HW DMZ, Virtual Appliance (VA), VA DMZ and Cloud. Up to 10 VA for HX included in the subscription cost but must be quoted separately. HW appliance and Cloud HX deployment SKUs need to be purchased separately. Quotes and Orders must additionally include the required number of deployment option physical/virtual appliances if required by customer - for corresponding appliance activation keys. LIMITATIONS and REQUIREMENTS: Customers must initially purchase a minimum of 250 licenses. RESTRICTIONS: Limited to a maximum of 5 devices per User. ePO - SaaS does not support all product features. Refer to specific product documentation for the latest compatibility with ePO - SaaS.

Endpoint Suites (SaaS & On-Premise)

EPCR-AU

Trellix Endpoint Core Cloud (Australia Data Center)
LICENSE: Per User
DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment.
MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL).
FEATURES INCLUDED: Protection for Native Security, Endpoint Security for Windows, Endpoint Security for macOS, Endpoint Security for Linux, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights (for proactive prioritization of threats, prediction of countermeasure impacts and prescriptive improvements), and access to deploy Strategic Innovation Alliance (SIA) partner products, includes licenses for 5% of total purchased entitlement to subset of EDR SaaS features.
RESTRICTIONS: Limited to maximum of 5 devices per User. Features included are not ideal for deployments in physical, virtual, and/or cloud server environments; separate Server Security SKUs should be purchased. Trellix Insights requires ENS 10.7, ePO 5.10 cu7 (on-prem or hosted) or ePO - SaaS. ePO - SaaS does not support all product features. IVX Enterprise Cloud is available in US, EU, APJ data centers only. Device Control is only currently supported in this region with ePO - On-prem management. Refer to specific product documentation for the latest compatibility with ePO - SaaS. For further exceptions, please refer to the Quoting Handbook.

EPEN-AU

Trellix Endpoint Enterprise Cloud (Australia Data Center)
loud is available in US, EU, APJ data centers only. For further exceptions, please refer to the Quoting Handbook.LICENSE: Per User
DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment. IaaS in AWS, Azure or GCP for Trellix Endpoint Security (HX)
MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, Endpoint Security (HX)- Cloud HX, Endpoint Security (HX) – vHX, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL).
FEATURES INCLUDED: Unified Trellix EDR with Forensics (EDRF) platform combines Trellix Endpoint Security HX and Trellix EDR, offering advanced detection, investigation, forensics, and response for Windows, macOS, and Linux platforms in both On-Prem and SaaS environments. Includes optional EDRF on-prem (EOP) Virtual Appliance for on-prem Historical Search. Includes Protection for Native Security, Endpoint Security for Windows, macOS, and Linux Platforms, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights (for profiling "Top Attacks" with guidance to improve protection), and access to deploy Strategic Innovation Alliance (SIA) partner products. Includes up to 1 unit of Platform API and access to Wise Freemium. HX Controller deployment options include HW, HW DMZ, Virtual Appliance (VA), VA DMZ and Cloud. Included in the subscription are licensing entitlements for HX deployment: up to 10 virtual appliances (VA) and one (1) Trellix-hosted cloud HX. The two deployment types must be quoted seperately. Quotes and Orders must additionally include the required number of deployment option physical/virtual appliances if required by customer - for corresponding appliance activation keys. HX Mode of deployment defaults to 2-Way licensing
LIMITATIONS and REQUIREMENTS: Customers must initially purchase a minimum of 250 licenses.
RESTRICTIONS: Limited to maximum of 5 devices per User. ePO - SaaS does not support all product features. Refer to specific product documentation for the latest compatibility with ePO - SaaS. This

EPCRH-SG	**Trellix Endpoint Core Hybrid (Singapore Data Center)** LICENSE: Per User DELIVERABLE: Software download for on-premises deployment. MANAGEMENT: ePO - On-prem, ePO - IaaS, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL). FEATURES INCLUDED: Protection for Native Security, Endpoint Security for Windows, Endpoint Security for macOS, Endpoint Security for Linux, Device Control, Command Line Scanner, Application Control for PCs, Trellix Insights (for proactive prioritization of threats, prediction of countermeasure impacts and prescriptive improvements), and access to deploy Strategic Innovation Alliance (SIA) partner products. RESTRICTIONS: Limited to maximum of 5 devices per User. Features included are not ideal for deployments in physical, virtual, and/or cloud server environments; separate Server Security SKUs should be purchased. Trellix Insights requires ENS 10.7, ePO 5.10 cu7 (on-prem or hosted). For further exceptions, please refer to the Quoting Handbook. Please note that IVX Enterprise Cloud and EDR is not currently available on Singapore Data Center so no SaaS Services are included in this specific Trellix Core SKU / offering.

Protection (SaaS & On-Premise)

EPESC-IL

Trellix Endpoint Essentials Cloud (GovCloud IL5)
LICENSE: Per User
DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment.
MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, and Data Exchange Layer (DXL).
FEATURES INCLUDED: Protection for Native Security, Endpoint Security for Windows, Endpoint Security for macOS, Endpoint Security for Linux, Device Control, Command Line Scanner.
RESTRICTIONS: Limited to maximum of 5 devices per User. Features included are not ideal for deployments in physical, virtual, and/or cloud server environments; separate Server Security SKUs should be purchased. For further exceptions, please refer to the Quoting Handbook.

IPS-NSM-25		**Trellix Network Security Manager Appliance - 2025** LICENSE: Separate subscription required. DELIVERABLE: Hardware appliance loaded with required but separate corresponding NSM subscription license. PRODUCT CONTENT: Delivers turn-key hardware appliance with dual power supply standard. REQUIRES purchase of a separate software subscription license. The hardware can be used for any of the purposes related to managing NSP sensors. This includes NSM Standard, NSM Global/CM subscription or use as a failover. Annual support includes hardware support only. Software support is included in the subscription license. Purchase of NSM hardware appliance is optional and customers can opt for a software only manager by just subscribing to a software license. NOTE : "Appliance contains the latest hardware components, CPU and RAM to support the X600 IPS Sensors and meet the performance and sustenance requirements."

SIEM Combination

All new/ initial SIEM opportunities require Professional Services. Reference the Quoting Handbook Product Requirements General Guidance, under SIEM section, for detailed quote and order guidance.

ENM-ELM-6100

Trellix Enterprise Security Manager, Log Manager and Event Receiver Combination 6100
LICENSE: Per Unit.
PRODUCT CONTENT: Provides SIEM, Log Management, and Network Analysis functions. Includes Event Receiver. Provides compliant Log Management and collects data for correlation and analysis by Enterprise Security Manager. Includes 25.6 TB + 1.6 TB SSD local storage. (Raw log retention requires external storage. Optional SAN card sold separately). 1U Appliance. The corresponding Hardware and Business Software Support SKU is required to be sold with the appliance and provided on one consolidated purchase order.Usable event and flow data storage capacity will vary by customer event types, event rates, software version, and other factors.

Trellix Thrive Success Packages					
THRIVE-ADV		**Thrive Advanced** Thrive Advanced is a holistic services offering focused on helping customers derive the full value from their investments in solutions and optimize their security operations. Thrive Advanced includes Flex Credits that unlock a menu of adoption focused modular services as well as existing traditional consulting, education, and expert support services. Thrive Advanced additionally provides Advanced Routing for S1 issues, 24/7/365 phone support, live chat and email case submission, Case Prioritization and improved Response SLOs over Thrive Essential. The price of Thrive Advanced is determined based on Trellix software product spend. Flex Credits quantity is determined by the final price of Thrive Advanced. REQUIREMENTS: The initial Account order for entry to Thrive Advanced requires the THRIVE-ADV additional fee to be subject to a minimum value of $5000 USD. All subsequent product orders and renewals for the Account are NOT subject to this minimum for the additional fee.

HWA-OHC-RS1-PP		**Health Watch - Onsite Prepaid** The Health Watch Onsite provides customers with an initial assessment to evaluate the overall operational environment without ongoing assessments. During the initial assessment, subject matter experts (SMEs) will review product implementation and security infrastructure. The initial assessment is a one-time, one-week on-site review (limited to not more than five days of the current operational and planned environment). This service does not provide ongoing assessments. SMEs will review the various Trellix products deployed, integration/automation needs and changes/upgrades in the environment. SME's will use a diagnostic tool to aid in the assessments/reviews to provide a comprehensive review of the overall environment. The deliverable is an initial assessment report. The assessment report contains at a minimum an executive overview, technical and operational findings, technical issues, key action items and recommendations. No SOW required.

HWA-QTR-RS4-PP		**Health Watch - Quarterly Prepaid** The Health Watch Quarterly service provides customers with an initial assessment to evaluate the overall operational environment with ongoing quarterly assessments. During the initial assessment, subject matter experts (SMEs) will review product implementation and security infrastructure. The initial assessment is an Online, a one-time, one-week onsite review (limited to not more than five days) of the current operational and planned environment. This service also provides ongoing assessments with SMEs to review the various Trellix products purchased and deployed with a focus on ePO and other products (e.g. endpoints). The initial assessment is followed up with three one-day quarterly remote assessments/sessions. Quarterly assessment services follow the organizations progress toward improving the overall ePO and the customer's detection/protection environment. SMEs will review the various products deployed, integration/automation needs and changes/upgrades in the environment. SME's will use a diagnostic tool to aid in the assessments/reviews to provide a comprehensive review of the overall environment. The deliverables include an initial assessment report followed by three subsequent quarterly reports. Assessment reports contains at a minimum an executive overview, technical and operational findings, technical issues, progress/plan notes and recommendations. Quarterly assessments will also address outstanding or newly discovered items since the initial or other executed assessments. No SOW required.

HWA-LTE-RS1-PP		**Health Watch - Lite Prepaid** The Health Watch Lite provides customers with an initial assessment to evaluate the overall operational environment without ongoing assessments. During the initial assessment, subject matter experts (SMEs) will review product implementation, analyze current product footprint and Trellix product security infrastructure. The initial assessment is a one-time engagement, and is limited to a one-day (8 hour) review. This service does not provide ongoing assessments. SMEs will review the various products deployed, integration/automation needs and changes/upgrades in the environment. SME's will use a diagnostic analytical tool to aid in the assessment/review to provide a comprehensive review of the overall environment. The sole deliverable is a Health Watch assessment report. The assessment report contains at a minimum an executive overview, technical and operational findings, identified technical issues, key action items needed and recommendations. The report is delivered in electronic format (PDF). No SOW required.

TIG-INTAAS-LG		**Trellix Threat Intelligence-as-a-Service Large - Upfront Billing** 1 year Subscription. Upfront Billing. Subscription provides advanced all-source research, analysis, and reporting in response to customer requests for intelligence (RFIs). INCLUDES: This service provides: 1) Up to five minor requests per month; and 2) One major request per month, 3) Quarterly Executive Level Threat Briefings 4) Weekly Micro Reports and 5) Monthly Threat Trends Reports. Minor requests are limited in scope, noncomplex, and are fulfilled within hours or days, dependent upon scope, by querying Trellix tools and data sets to provide information on tactical level questions or atomic level threat and telemetry. Responses are not based on in-depth research but pulled from raw data sources and curated by Trellix researchers. Minor requests are relatively simple and straightforward questions that require little to no scoping dialogue with the customer and do not require extensive research and analysis. Major requests are broader in scope and complexity and are fulfilled within days, weeks, or months, depending on the scope, scale, and complexity, through extensive research and analysis using Trellix and third-party tools and datasets combined with all-source intelligence gathering. Trellix researchers develop curated reporting that is peer-reviewed and provides strategic and operational level information. Major request questions may be simple or complex and require the researcher to engage in continuous scoping dialogue with the customer team throughout the production process. Executive Level Threat Briefings provide an overview of information relevant or potentially relevant to the customer organization. The overview includes a strategic view of threat actor presence, behavior, patterns, and trends - globally, by country, or by specified area of interest based on Trellix' global data and analytics. It also includes information developed through previous major and minor requests. The composition of this information is intended to provide executives with an understanding of actual and potential threats that will aid decision-making to improve protection and readiness of the organization. LIMITATIONS: N/A REQUIREMENT: SOW approved by Threat Intelligence Services Senior Director required.

TIG-THREAT-REPORTS	**Trellix Threat Reports - Upfront Billing** 1 year Subscription. Upfront Billing. INCLUDES: This service provides: 1) Weekly micro threat reports and 2) Monthly threat trends reports delivered in written format via email for a period of 1 year. Customers may request reports on specific threats or receive reports on threats chosen by Trellix. Micro Threat Reports: The Micro Threat Intel Reports offer a concise, high-level overview of specific cybersecurity campaigns, threats, or vulnerabilities, tailored to provide quick and targeted insights. This service is particularly valuable for organizations needing a rapid understanding of a particular threat landscape without the commitment to extensive research. Leveraging Trellix's existing, robust database of analyzed and cataloged data, each report distills essential information, presenting it in an easily digestible format. Ideal for making informed decisions in a timely manner, this service enables your team to stay ahead of emerging threats by providing crucial intelligence exactly when it's needed. Whether for strategic planning, risk assessment, or simply staying informed on the latest cybersecurity trends, our Micro Threat Intel Report ensures you have the focused intelligence at your fingertips, aiding in maintaining a proactive security posture. Threat Trends Reports: A report on prevalent threats and associated trends with regional or global focus. Provides highlights and trends concerning recent threat activity, globally or regionally, information regarding major vulnerabilities and associated exploits, and information related to APT activity to include infrastructure, tactics, techniques, and procedures. The reports may include information about cyber activity associated with geopolitical conflicts and crises. These reports may also include vulnerability research. LIMITATIONS: N/A REQUIREMENT: N/A

	Managed Security Services				

Band	Range	Description	PartNo	MSRP List Price	Standard Channel SKU
HWA-MSP-RS4-PP		**Health Watch - Managed Security Service Provider Prepaid** A Health Watch Managed Security Service Provider service provides customers with an initial assessment to evaluate the overall operational environment with ongoing quarterly assessments. During the initial assessment, subject matter experts (SMEs) will review product implementation and security infrastructure. The initial assessment is an Online, 8 hour remote review of the current operational and planned environment. This service also provides ongoing assessments with SMEs to review the various Trellix products purchased and deployed with a focus on ePO and other Trellix products (e.g. endpoints). The initial assessment is followed up with three one-day quarterly remote assessments/sessions. Quarterly assessment services follow the organizations progress toward improving the overall ePO and the customer's detection/protection environment. SMEs will review the various products deployed, integration/automation needs and changes/upgrades in the environment. SME's will use a diagnostic tool to aid in the assessments/reviews to provide a comprehensive review of the overall environment. The deliverables include an initial assessment report followed by three subsequent quarterly reports. Assessment reports contains at a minimum an executive overview, technical and operational findings, technical issues, progress/plan notes and recommendations. Quarterly assessments will also address outstanding or newly discovered items since the initial or other executed assessments. Service only applicable to a single customer.No SOW required.

		Technical Support			
COMPLY-NODE		**Out of Compliance Charges- Software Node/User** Administration, setup and re-instatement fee for customers who are out of compliance regarding license usage and/or support or subscription license lapses. Use COMPLY-HW for products sold on a "per unit, seat or appliance" basis. Use COMPLY-NODE for products sold on a "per node" basis. This fee is in addition to the standard support. To determine the Quantity chargeable you must multiply the Nodes or Unit count by the number of months that the lapse has existed for. Example: A 200 node support lapsed for 3 months requires 600 units of charge to be applied. All Quotes requiring an Out of Compliance Charge must be referred to the License Compliance Team [LCS] for review and approval.			
	Standard Offering				
	Software Support Fee				
	1-+	Out of Comply (Node Based) Penalty	COMPLY-NODE	1.20	COMPLY-NODEA
COMPLY-HW		**Out of Compliance Charges- Hardware Device** Administration, setup and re-instatement fee for customers who are out of compliance regarding license usage and/or support or subscription license lapses. Use COMPLY-HW for products sold on a "per unit, seat or appliance" basis. This fee is in addition to the standard support. To determine the Quantity chargeable you must multiply the Unit count by the number of months that the lapse has existed for. Example: A 10 unit support lapsed for 3 months requires 30 units of charge to be applied. All Quotes requiring an Out of Compliance Charge must be referred to the License Compliance Team [LCS] for review and approval.			
	Standard Offering				
	Hardware Support Fee				
	1-+	Out of Comply (Unit Based) Penalty	COMPLY-HW	120.00	COMPLY-HWA
MEDIA-RET		**Single Media Retention Item/Service Fee** Organizations who require Media Retention, and do not have a hardware support level which includes this service, may use the Single Media Retention Item/Service Fee for each item retained. The hardware appliance must be returned in accordance to standard policy once the media items have been removed. Please reference the Quoting Handbook and Hardware Handbook (Media Retention Policy) for more information.			
	Standard Offering				
	Hardware Support Fee				
	1-+	Single Media Retention Item/Service	MR-ITEM-SER	803.40	MR-ITEM-SERA

EPCR-UM

Trellix Endpoint Core Cloud (GovCloud Data Center)
LICENSE: Per User
DELIVERABLE: Software as a Service (SaaS) with activation email and/or software download for on-premises deployment.
MANAGEMENT: ePO - SaaS, ePO - On-prem, ePO - IaaS, Threat Intelligence Exchange (TIE), Threat Intelligence Exchange - SaaS and Data Exchange Layer (DXL).
FEATURES INCLUDED: Protection for Native Security, Endpoint Security for Windows, Endpoint Security for macOS, Endpoint Security for Linux, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights (for proactive prioritization of threats, prediction of countermeasure impacts and prescriptive improvements), and access to deploy Strategic Innovation Alliance (SIA) partner products, includes licenses for 5% of total purchased entitlement to subset of EDR SaaS features.
RESTRICTIONS: Limited to maximum of 5 devices per User. Features included are not ideal for deployments in physical, virtual, and/or cloud server environments; separate Server Security SKUs should be purchased. Trellix Insights requires ENS 10.7, ePO 5.10 cu7 (on-prem or hosted) or ePO - SaaS. ePO - SaaS does not support all product features. IVX Enterprise Cloud is available in US, EU, APJ data centers only. Gov Cloud data center is located in the United States. The optional components, IVX, Device Control, Command Line Scanner, Protection for Native Security, Threat Intelligence Exchange (TIE) and Application Control are not FedRAMP authorized. Device Control is only currently supported in this region with ePO - On-prem management. Refer to specific product documentation for the latest compatibility with ePO - SaaS. For further exceptions, please refer to the Quoting Handbook.

Protection and EDR (SaaS & On-Premise)

EDR-WISE-UM

Trellix Wise for EDR Add-on (GovCloud Data Center)
LICENSE: Per User.
MANAGEMENT: Trellix EDR
DELIVERABLE: Software as a Service (SaaS) with activation email.
FEATURES INCLUDED: Trellix Wise for EDR uses generative AI capabilities to improve operational efficiency of SOC analyst for Endpoint Detections and Response product. It allows genAI powered capabilities like Multi-lingual threat hunting, Dossier and Interactive modes, as well as threat knowledge graph kind of capabilities.
PRODUCT REQUIRES: Separate Trellix EDR subscription on endpoints.
RESTRICTIONS: To be sold to customers with Trellix EDR subscriptions. The number of licenses of Trellix Wise for EDR must be equal to the number of licenses of base Trellix EDR SKU. The allotted usage of genAI powered capabilities is tied to the number of licenses in the Trellix EDR subscriptions.

FEATURES INCLUDED: Protection for Native Security, Endpoint Security for Windows, Endpoint Security for macOS, Endpoint Security for Linux, Device Control, Command Line Scanner, Application Control for PCs, IVX Enterprise Cloud for system automated submissions, Trellix Insights (for proactive prioritization of threats, prediction of countermeasure impacts and prescriptive improvements), and access to deploy Strategic Innovation Alliance (SIA) partner products, includes licenses for 5% of total purchased entitlement to subset of EDR SaaS features. RESTRICTIONS: Limited to maximum of 5 devices per User. Features included are not ideal for deployments in physical, virtual, and/or cloud server environments; separate Server Security SKUs should be purchased. Trellix Insights requires ENS 10.7, ePO 5.10 cu7 (on-prem or hosted). IVX Enterprise Cloud is available in US, EU, APJ data centers only. Gov Cloud data center is located in the United States. The optional components, IVX, Device Control, Command Line Scanner, Protection for Native Security, Threat Intelligence Exchange (TIE) and Application Control are not FedRAMP authorized. For further exceptions, please refer to the Quoting Handbook.

MV4	**Trellix EDR** End of Sale is 30 June 2026. Existing customers must also upgrade to Endpoint Essentials, Core or Enterprise at next renewal. License expansion requirements can be quoted but must co-term with the existing subscription end-date. LICENSE: 12 month Subscription, License is Per User. Each Virtual Instance or Server is equivalent to 1 User. MANAGEMENT: ePO - SaaS included to manage Trellix EDR subscriptions. DELIVERABLE: Trellix EDR automatically detects advanced threats from the endpoint or a supported SIEM (optional), maps them to the MITRE ATT&CK® framework and guides you through the investigation to reduce response time. Trellix EDR also gives you the ability to search and hunt for threats via ad-hoc queries on endpoints. Guided investigations utilizing 30-days of historical endpoint data. This is a SaaS service with an activation email and agent download. Please confirm regional data centers are in place for customers that have data residency restrictions. Includes entitlement to upgrade to our latest EDRF Client that will replace EDR Client. We recommend using it in place of the standard EDR Client. Note this does not entitle to all EDRF functionality included in Endpoint Enterprise. PRODUCT REQUIRES: ePO - On-prem for deployment on-premises. Refer to the FAQ's for latest product compatibility matrix for the latest version requirements. Does not require Endpoint protection, but will require the Trellix Agent. RESTRICTIONS: Limited to maximum of 5 devices per User.

	Cloud Native Application Protection Platform				
C42	**Skyhigh CNAPP - CSPM Account Pooled** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS accounts to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS platform (up to 300 resources per account), configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS accounts across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Account is required for each individual IaaS platform. Your purchase entitles you to select which IaaS accounts to audit, e.g., you purchase 10 CSPM Account Pooled licenses and audit 2 AWS accounts, 3 GCP projects, and 5 Azure subscription. Standard Offerings only. An "IaaS Account" means, in relation to an AWS Account, Azure Subscription, or GCP Project, the basic unit where all resources are contained within the IaaS offering, respectively, such as compute, network, and storage instances. An IaaS Account is an operational and billing controls boundary by product, application workload, or program. Companies may create multiple accounts for administrative isolation between workloads, or to provide limited visibility and discoverability of workloads for instance. An active container is any online instance of a container. In container workloads, it's common for one single container image to be running multiple instances resulting in some number of active containers.

C61	**Skyhigh CNAPP - CSPM Resource Pooled** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS resources to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS resources, configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS resources across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Resource is required for each individual IaaS platform. Your purchase entitles you to select which IaaS resources to audit, e.g., you purchase 100 CSPM Resource Pooled licenses and audit 20 AWS resources, 30 GCP resources, and 50 Azure resources. Standard Offerings only. An "IaaS Resource" to a fundamental component or an entity that you can work with and is managed by the supported IaaS providers. Specific resource types for AWS are Elastic Compute Cloud (EC2), Elastic Container Service (ECS), Elastic Kubernetes Service (EKS), Relational Database Service (RDS), RedShift, DynamoDB, ElasticCache, Elastic Load Balancing (ELB), NAT Gateway. Specific resource types for Azure are Virtual Machines (VM), Azure Kubernetes Service (AKS), Cosmos DB, SQL Database, Database for MySQL, Database for PostgreSQL, Database for MariaDB, Load Balancer, and NAT Gateway. Specific resource types for GCP are Virtual Machine (VM) instances, Google Kubernetes Engine (GKE), Cloud SQL, Load Balancing, and Cloud Nat.

SEBSC	**Skyhigh Secure Browser Controls (AddOn)** LICENSE: Per user/per endpoint node DELIVERABLE: Activation via email PRODUCT CONTENT: This product provides enterprise-level browser-based data security controls designed to prevent the exfiltration of sensitive information from the corporate network, significantly bolstering an organization's zero-trust and data security posture. This add-on enables customers to implement Data Loss Prevention (DLP) controls, specifically preventing the uploading of confidential files to any web apps including any specialized web-sockets based platforms such as Microsoft Co-pilot and Web WhatsApp, restricting the copying of sensitive data to the clipboard (e.g., copy/paste limitations), inhibiting the saving of websites data as local files, and blocking the drag-and-drop of sensitive files to excluded websites from any modern browser on any device (without necessitating the replacement of company standardized browsers). Furthermore, this add-on substantially enhances an organization's zero trust and data security posture. It functions as an add-on to the following SKUs: MVW, MVW-ADV, MPA, SSEFW, SSEFWB, UCEB, UCEA, and UCEC, and is configurable via policy. PRODUCT REQUIREMENT: As an add-on SKU, the customer must possess an active entitlement for one of the following base SKUs: MVW, MVW-ADV, MPA, SSEFW, SSEFWB, UCEB, UCEA, or UCEC.

Band	Range	Description	PartNo	MSRP List Price	Standard Channel SKU
C42-DE	**Skyhigh CNAPP - CSPM Account Pooled (Germany Data Center)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS accounts to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS platform (up to 300 resources per account), configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS accounts across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Account is required for each individual IaaS platform. Your purchase entitles you to select which IaaS accounts to audit, e.g., you purchase 10 CSPM Account Pooled licenses and audit 2 AWS accounts, 3 GCP projects, and 5 Azure subscription. Standard Offerings only. An "IaaS Account" means, in relation to an AWS Account, Azure Subscription, or GCP Project, the basic unit where all resources are contained within the IaaS offering, respectively, such as compute, network, and storage instances. An IaaS Account is an operational and billing controls boundary by product, application workload, or program. Companies may create multiple accounts for administrative isolation between workloads, or to provide limited visibility and discoverability of workloads for instance. An active container is any online instance of a container. In container workloads, it's common for one single container image to be running multiple instances resulting in some number of active containers.

C61-DE	**Skyhigh CNAPP - CSPM Resource Pooled (Germany Data Center)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS resources to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS resources, configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS resources across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Resource is required for each individual IaaS platform. Your purchase entitles you to select which IaaS resources to audit, e.g., you purchase 100 CSPM Resource Pooled licenses and audit 20 AWS resources, 30 GCP resources, and 50 Azure resources. Standard Offerings only. An "IaaS Resource" to a fundamental component or an entity that you can work with and is managed by the supported IaaS providers. Specific resource types for AWS are Elastic Compute Cloud (EC2), Elastic Container Service (ECS), Elastic Kubernetes Service (EKS), Relational Database Service (RDS), RedShift, DynamoDB, ElasticCache, Elastic Load Balancing (ELB), NAT Gateway. Specific resource types for Azure are Virtual Machines (VM), Azure Kubernetes Service (AKS), Cosmos DB, SQL Database, Database for MySQL, Database for PostgreSQL, Database for MariaDB, Load Balancer, and NAT Gateway. Specific resource types for GCP are Virtual Machine (VM) instances, Google Kubernetes Engine (GKE), Cloud SQL, Load Balancing, and Cloud Nat.

RP-RBI-DE	**Skyhigh Cloud App Isolation - Unmanaged AddOn (Germany Data Center)** LICENSE: Per User. DELIVERABLE: Welcome email. PRODUCT CONTENT: Add-on enables the customer to use the integration between the Reverse Proxy and Forward Proxy / RBI to enforce controls on unmanaged device traffic. For this control to work, the customer should already have a sanctioned SaaS subscription (or any bundle that contains CASB sanctioned SaaS). This SKU allows customers to apply access controls and DLP via web proxy and RBI. If the customer has SSE (SWG) subscriptions, then they will be able to apply additional controls available via web proxy using Web Policy. Customers who have purchased full isolation will have this feature already available to them and need not purchase this SKU. Regional Data Center support: US and EU only. FedRAMP not supported.

SEBSC-DE	**Skyhigh Secure Browser Controls (AddOn) (Germany Data Center)** LICENSE: Per user/per endpoint node DELIVERABLE: Activation via email PRODUCT CONTENT: This product provides enterprise-level browser-based data security controls designed to prevent the exfiltration of sensitive information from the corporate network, significantly bolstering an organization's zero-trust and data security posture. This add-on enables customers to implement Data Loss Prevention (DLP) controls, specifically preventing the uploading of confidential files to any web apps including any specialized web-sockets based platforms such as Microsoft Co-pilot and Web WhatsApp, restricting the copying of sensitive data to the clipboard (e.g., copy/paste limitations), inhibiting the saving of websites data as local files, and blocking the drag-and-drop of sensitive files to excluded websites from any modern browser on any device (without necessitating the replacement of company standardized browsers). Furthermore, this add-on substantially enhances an organization's zero trust and data security posture. It functions as an add-on to the following SKUs: MVW-DE, MVW-ADV-DE, MPA-DE, SSEFW-DE, SSEFWB-DE, UCEB-DE, UCEA-DE, and UCEC-DE, and is configurable via policy. PRODUCT REQUIREMENT: As an add-on SKU, the customer must possess an active entitlement for one of the following base SKUs: MVW-DE, MVW-ADV-DE, MPA-DE, SSEFW-DE, SSEFWB-DE, UCEB-DE, UCEA-DE, and UCEC-DE

		Cloud Native Application Protection Platform			
C42-FM		**Skyhigh CNAPP - CSPM Account Pooled (GovCloud Moderate)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS accounts to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS platform (up to 300 resources per account), configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS accounts across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Account is required for each individual IaaS platform. Your purchase entitles you to select which IaaS accounts to audit, e.g., you purchase 10 CSPM Account Pooled licenses and audit 2 AWS accounts, 3 GCP projects, and 5 Azure subscription. Standard Offerings only. An "IaaS Account" means, in relation to an AWS Account, Azure Subscription, or GCP Project, the basic unit where all resources are contained within the IaaS offering, respectively, such as compute, network, and storage instances. An IaaS Account is an operational and billing controls boundary by product, application workload, or program. Companies may create multiple accounts for administrative isolation between workloads, or to provide limited visibility and discoverability of workloads for instance. An active container is any online instance of a container. In container workloads, it's common for one single container image to be running multiple instances resulting in some number of active containers.

C61-FM		**Skyhigh CNAPP - CSPM Resource Pooled (GovCloud Moderate)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS resources to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS resources, configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS resources across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Resource is required for each individual IaaS platform. Your purchase entitles you to select which IaaS resources to audit, e.g., you purchase 100 CSPM Resource Pooled licenses and audit 20 AWS resources, 30 GCP resources, and 50 Azure resources. Standard Offerings only. An "IaaS Resource" to a fundamental component or an entity that you can work with and is managed by the supported IaaS providers. Specific resource types for AWS are Elastic Compute Cloud (EC2), Elastic Container Service (ECS), Elastic Kubernetes Service (EKS), Relational Database Service (RDS), RedShift, DynamoDB, ElasticCache, Elastic Load Balancing (ELB), NAT Gateway. Specific resource types for Azure are Virtual Machines (VM), Azure Kubernetes Service (AKS), Cosmos DB, SQL Database, Database for MySQL, Database for PostgreSQL, Database for MariaDB, Load Balancer, and NAT Gateway. Specific resource types for GCP are Virtual Machine (VM) instances, Google Kubernetes Engine (GKE), Cloud SQL, Load Balancing, and Cloud Nat.

Band	Range	Description	PartNo	MSRP List Price	Standard Channel SKU
C42-UM		**Skyhigh CNAPP - CSPM Account Pooled (GovCloud High)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS accounts to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS platform (up to 300 resources per account), configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS accounts across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Account is required for each individual IaaS platform. Your purchase entitles you to select which IaaS accounts to audit, e.g., you purchase 10 CSPM Account Pooled licenses and audit 2 AWS accounts, 3 GCP projects, and 5 Azure subscription. Standard Offerings only. An "IaaS Account" means, in relation to an AWS Account, Azure Subscription, or GCP Project, the basic unit where all resources are contained within the IaaS offering, respectively, such as compute, network, and storage instances. An IaaS Account is an operational and billing controls boundary by product, application workload, or program. Companies may create multiple accounts for administrative isolation between workloads, or to provide limited visibility and discoverability of workloads for instance. An active container is any online instance of a container. In container workloads, it's common for one single container image to be running multiple instances resulting in some number of active containers.

C61-UM		**Skyhigh CNAPP - CSPM Resource Pooled (GovCloud High)** LICENSE: Per IaaS Account (defined below). DELIVERABLE: Welcome email. PRODUCT CONTENT: Cloud Security Posture Management (CSPM) service designed to support security, compliance, and governance for Infrastructure as a Service (IaaS) platforms. Customers can audit IaaS resources to detect risky misconfigurations, benchmark configurations against industry standards like CIS, PCI, HIPAA, NIST, and detect anomalous activity which may be indicative of compromised accounts. Service features include configuration audit of IaaS resources, configuration audit of container services, automatic remediation, Data Loss Prevention (DLP) and malware scanning as response actions, shift-left integration, vulnerability assessment, activity monitoring, and threat analytics. Customer can audit IaaS resources across Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP). One active IaaS Resource is required for each individual IaaS platform. Your purchase entitles you to select which IaaS resources to audit, e.g., you purchase 100 CSPM Resource Pooled licenses and audit 20 AWS resources, 30 GCP resources, and 50 Azure resources. Standard Offerings only. An "IaaS Resource" to a fundamental component or an entity that you can work with and is managed by the supported IaaS providers. Specific resource types for AWS are Elastic Compute Cloud (EC2), Elastic Container Service (ECS), Elastic Kubernetes Service (EKS), Relational Database Service (RDS), RedShift, DynamoDB, ElasticCache, Elastic Load Balancing (ELB), NAT Gateway. Specific resource types for Azure are Virtual Machines (VM), Azure Kubernetes Service (AKS), Cosmos DB, SQL Database, Database for MySQL, Database for PostgreSQL, Database for MariaDB, Load Balancer, and NAT Gateway. Specific resource types for GCP are Virtual Machine (VM) instances, Google Kubernetes Engine (GKE), Cloud SQL, Load Balancing, and Cloud Nat.

SSE-DEIP-UM		**Skyhigh SSE Dedicated Egress IP - AddOn (GovCloud High)**				

Skyhigh NON GA QUOTES ONLY

Skyhigh Security SKUs are limited to Skyhigh Security Authorized Distributors Only.

NON GA (Budgetary / Provisional Quotes ONLY)

Products on this tab are NON GA (not generally available). The SKUs and Prices listed are to be used for budgetary / provisional quotes ONLY. The SKUs and Prices represented may change when the product becomes GA (generally available) and that will be the 'orderable' price. Listed FCS (first customer ship) dates are target release dates which are subject to change. Once a product becomes GA, it will be removed from the 'NON GA' tab. The final SKUs and Prices will be on the appropriate GA tab at which time orders can be placed and will be accepted. This Tab is NOT for submission to GSA.

SSE-DEIP-UM

Skyhigh SSE Dedicated Egress IP - AddOn (GovCloud High)
LICENSE: Per IP
DELIVERABLE: Activation via email
PRODUCT CONTENT: Add on provides ability to egress the traffic out of SSE using a Skyhigh provided dedicated IP
RESTRICTION: Available as an add-on to UCEB-UM. Standalone purchases of this SKU is not allowed. Only enabled in Data Center locations that support SSE
Note : A minimum of 2 IP address are required for redundancy.
Hosted in a FedRAMP High authorized data center located in the United States.

Add-Ons

RP-RBI-UM

Skyhigh Cloud App Isolation - Unmanaged AddOn (GovCloud High)
LICENSE: Per User. DELIVERABLE: Welcome email.
PRODUCT CONTENT: Add-on enables the customer to use the integration between the Reverse Proxy and Forward Proxy / RBI to enforce controls on unmanaged device traffic. For this control to work, the customer should already have a sanctioned SaaS subscription (or any bundle that contains CASB sanctioned SaaS). This SKU allows customers to apply access controls and DLP via web proxy and RBI. If the customer has SSE (SWG) subscriptions, then they will be able to apply additional controls available via web proxy using Web Policy. Customers who have purchased full isolation will have this feature already available to them and need not purchase this SKU.
Regional Data Center support: Hosted in a FedRAMP High authorized data center located in the United States.
