Tenable Price Book for AMER

Mar 2026

Special Notes for March 2026 Price Book

1 For Tenable One licensing, customers purchase Assets that are then allocated to the individual component products as required. Each component product consumes Assets at a specific rate. Read about it in detail here: https://docs.tenable.com/quick-reference/licensing-guide/Content/tenable-one-licensing.htm#TenableOneProducts

Using this Price Book

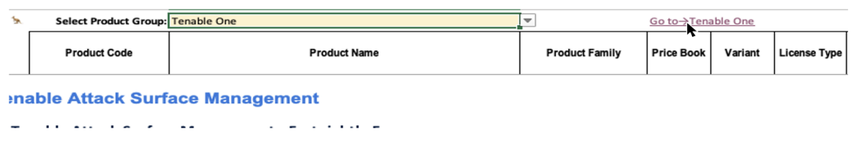
Finding Products

1 All products are on a single sheet.

2 Navigate quickly to the products you need using the Product Group menu.

1 Select the product group required in the drop down menu:

2 Click on the "Go to→" link:



Loading Products

The two step process allows us to distribute a macro/script free workbook.

1 For those needing to load data into their systems a "Load" sheet has been provided to help out.

2 Tenable's systems do not use unique SKUs for every pricing level or class so it is unlikely you can simply load this data exactly as is. Prices are distinguished by a combination of SKU, Price Book, and Variant. For products based on the progressive model, each level is distinguished by Tier.

a) For tiered pricing, the load sheet can be used in two ways—depending on your requirements. Every Tier is presented as a separate line with that tier's pricing details. Alternatively, the first tier also has extra columns giving the details of the other tiers for that product.

b) The final column, labelled "Single Line Tiers Only?" allows you to filter out the other tier lines—leaving just Tier one and non-Tiered products.

3 The first column, labelled “Change” compares this price book to the previous one. For each line it can have one of these values:

New	This is the first time this product has been included in the price book.
Modified	This product has changed. Extra information stating what kind of change is provided in brackets. e.g. Modified (Price;Name;Order Cat;Other Details)
No Change	Same as previous price book.
Removed	We no longer sell this product. Do not load. It is included to help identify what SKUs to disable/remove from your systems.

Product Code	Product Name	Product Family	Price Book	Variant	License Type	Category	Unit of Measure	Order Category	Term (Years)	Price Scheme	Tier	Lower Bound	Upper Bound	Pricing Rule	Tier Base Price	Unit Price	Product Description	Note	Statement of Work Required?	Travel and Expenses Required?	End of Sale Date

Tenable Attack Surface Management

Tenable Attack Surface Management - Fortnightly Frequency

Tenable Attack Surface Management includes the continuous discovery, inventorying, and monitoring of an organization's internet or internal network infrastructure once every two weeks. Annual Subscription based on Observable Objects.
